

EMV Issuance Solution

Optimize your Issuance Solution with
Entrust Datacard™ and MULTOS™

Card issuance solution that matches your precise needs

Entrust Datacard™ high-volume card issuance solutions align with your exact requirements. Whether you are expanding an existing operation, moving your program in-house or launching your first high-volume operation, Entrust Datacard's highly efficient solutions can be configured to meet your precise needs. Their card personalization and card delivery platforms reflect more than 40 years of industry leadership - and they offer a range of customer-driven enhancements that empower you in important new ways.

Adaptive Issuance™ MULTOS Data Preparation and Perso

MULTOS is an option that is available within the complete Adaptive Issuance™ Suite -- built for **security, simplicity, and game-changing adaptability.**

Datacard® Adaptive Issuance™ Suite is a complete family of products for secure document issuance.

Datacard® Adaptive Issuance™ Job Enable provides an interface to automate daily tasks efficiently, reduce operator intervention and streamline operations in your issuance environment.

The platform is highly secure by controlling production job start and offers the ability to monitor Central Issuance systems and job status, and retrieve production statistics in real-time.

A LEGACY OF TRUST

Entrust Datacard™ is one of the founders of the contemporary smart card industry and has always been at the forefront in providing innovative smart card solutions. With a significant level of MULTOS expertise, Entrust Datacard™ are active in the development of MULTOS as a leading EMV solution.

Since the launch of MULTOS as an open standard smart card operating system, Entrust Datacard™ has been supplying "MULTOS Data Preparation and Personalization" software to card personalization bureaus and card issuers, which enables any MULTOS smart card application to be created and loaded to any MULTOS compliant chip using Entrust Datacard™ personalization equipment.

SECURITY & QUALITY

MULTOS has been at the heart of the secure smart card industry for 20 years, and over 1 billion secure MULTOS smart cards and devices have been shipped. It is industry renowned as the premier standard of security and quality, and has obtained the highest band of security approval, the Common Criteria EAL7 certification. MULTOS EMV cards are widely issued and provide issuers with a robust and reliable card holder asset.

Entrust Datacard™ has been a member of the MULTOS Consortium since 2005, and leverages the industry backed and highly secure MULTOS EMV smart card technology.
